

PRODUCTION READINESS CONTROL BOARD

Governance, Quality & ALM Skills Index

A release is ready when architecture, access, tests, deployment, and operations all have evidence.

A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate).

A release is ready when every stage — Plan & Secure → Test & Review → Deploy & Operate — has evidence. Purpose badges describe each skill's lifecycle intent.

Build → Review pairings

Change	builder output	→ independent review evidence	Deployment	pipeline/solution promotion	→ smoke test + rollback plan
Operation	monitoring owner	→ incident and change digest			

Daily decision rule

Do not treat 'build succeeded' as 'production ready.' Require evidence for design, access, quality, deployment, rollback, and ownership.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
