CREATE WITH POWER PAGES SKILLS · REVIEW WITH OVERPAGE

Power Pages Skills Index

Read each delivery-system boundary horizontally from planning through deployment and operations.

Rows = product surfaces · Columns = Power Pages delivery stages: PLAN → BUILD / INTEGRATE → SECURE → VALIDATE / REVIEW → DEPLOY / OPERATE

A skill's **Purpose** badge is its *global lifecycle intent* (Build · Author · Review · Deploy · Operate · Govern · Migrate) and may differ from the delivery column it sits in.

Delivery boundary	PLAN	BUILD / INTEGRATE	SECURE	VALIDATE / REVIEW	DEPLOY / OPERATE
Site Experience Frontend, backend, runtime, and release	**Create Site ↗** BUILD Create a modern Power Pages code site. Power Platform Skills · Skill	**Integrate Backend ↗** BUILD Choose Web API, server logic, cloud flow, or a combination. Power Platform Skills · Skill **Add Cloud Flow ↗** BUILD Connect notifications or asynchronous processes. Power Platform Skills · Skill **Edit Site ↗** BUILD Plan and customize a downloaded non-SPA Power Pages site: pages, content, navigation, templates and styling. Power Platform Skills · Skill **Author Webpage Content ↗** BUILD Compose the localized HTML body of an existing non-SPA webpage for edit-site; not a direct user command. Power Platform Skills · Skill	**manage-headers / firewall ↗** GOVERN Strengthen browser and network controls. Power Platform Skills · Skill	**Test Site ↗** REVIEW Crawl pages in a real browser and inspect console/network failures. Power Platform Skills · Skill **Scan Code ↗** REVIEW Inspect frontend code for issues before release. Power Platform Skills · Skill **HAR-assisted analysis ↗** REVIEW Map network bottlenecks to site code and components. Power CAT Skills · Skill **Analyze Performance ↗** REVIEW Scan a non-SPA Power Pages site for performance anti-patterns and offer safe fixes with approval. Power Platform Skills · Skill	**Deploy Site ↗** DEPLOY Build and upload a Power Pages code site. Power Platform Skills · Skill **Diagnose Deployment ↗** OPERATE Interpret deployment failures and remediation. Power Platform Skills · Skill
Dataverse & APIs Data model, Web API, and table access	**Setup Datamodel ↗** BUILD Design Dataverse tables and relationships. Power Platform Skills · Skill	**Integrate WebAPI ↗** BUILD Create typed clients, services, permissions, and settings. Power Platform Skills · Skill	**Audit Permissions ↗** REVIEW Review table permissions and scopes. Power Platform Skills · Skill **Migrate WebAPI SelectAll ↗** REVIEW Replace deprecated Web API wildcard fields with least-privilege explicit columns. Power Platform Skills · Skill	—	**Setup Solution ↗** DEPLOY Create the solution and deployment boundary. Power Platform Skills · Skill
Identity & Access Authentication and authorization boundaries	—	—	**Setup Auth ↗** GOVERN Configure authentication and identity providers. Power Platform Skills · Skill **Create WebRoles ↗** GOVERN Create roles and access mapping. Power Platform Skills · Skill	**Security Review ↗** REVIEW Run a security-focused site assessment. Power Platform Skills · Skill	—
Quality & ALM Architecture, pipelines, and independent assurance	**Plan ALM ↗** GOVERN Choose solution boundaries, pipelines, and deployment topology. Power Platform Skills · Skill	—	—	**PowerCAT OverPage ↗** REVIEW Six-pillar review: security, performance, accessibility, maintainability, architecture, and reliability. Power CAT Skills · Skill	**Setup Pipeline ↗** DEPLOY Configure Power Platform pipelines. Power Platform Skills · Skill

Build → Review pairings

Site build	create-site + integrate-backend	→ PowerCAT OverPage	Security	setup-auth + permissions	→ audit-permissions + security-review
Release	setup-pipeline + deploy-site	→ test-site + OverPage			

Daily decision rule

Build the experience and backend together. Validate authentication and table permissions before runtime testing. Run OverPage on the exported solution before customer handoff.

Portability: most pure Agent Skills are broadly installable on compatible hosts. Adapt host-specific tools, paths, plugins, permissions and MCP configuration.
